

CORELOGIC MULTIPLE LISTING SERVICES (MLS) DATASET

Hosted on the most flexible, fastest, easy-to-use platform for big data and analytics

1010data offers you the leading cloud-based big data analytics platform for CoreLogic's Multiple Listing Services (MLS) analysis. With pre-configured hosted datasets and system performance, scalability, and flexibility that go beyond any other solution on the market today, 1010data helps you analyze massive volumes of highly granular and disparate data, and turn it all into valuable insight.

FIND ALL THE DATA AND LOGIC YOU NEED IN ONE PLACE

1010data is your single source for the latest data to conduct CoreLogic MLS analytics. The data set combines listing data obtained directly from the MLS, public record information from CoreLogic, market trends and additional analytics. Risk managers, fraud managers, underwriters, appraisers, servicers, valuation professionals and others benefit from a complete and reliable source of meaningful, actionable property information. Additionally, you can upload your own in-house data to perform on-the-fly mashups and ad-hoc queries.

Analysis: Average Days a Property Remains Active by Metropolitan Area

DRIVE COMPETITIVE ADVANTAGE

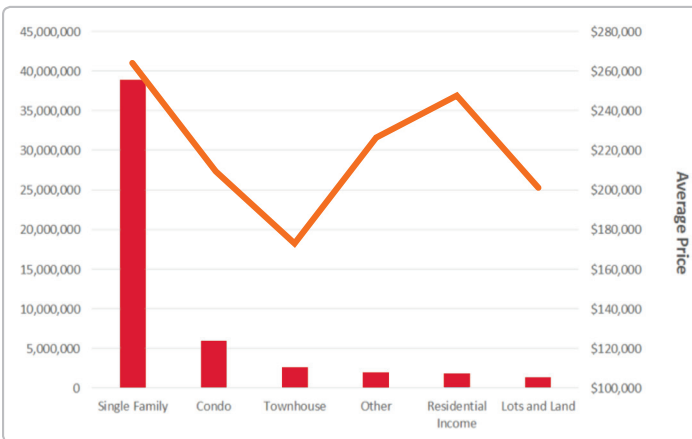

1010data enables you to conduct the most relevant and valuable analytics for MLS – faster than any other solution – directly from your desktop. Sample analytics include:

ANALYTICS	DESCRIPTION
Days on Market Analysis	Compare the average number of days a property is listed as active for different jurisdictions
List Price/Sold Ratios	Calculate the average percent discount between list and sold price at the zip code and county levels
Property Information Reports	Evaluate property characteristics, sales history and listing history
Listing and Sales History	Compute listing and sales price trends at the zip code and county levels

CONDUCT FAST, POWERFUL AND RICH ANALYSIS

Speed matters for MLS analytics, given the size and multiple sources of data as well as the need to gain insight and make decisions quickly. 1010data's technology delivers the fastest query speeds in the industry. Your most challenging analytics are returned in seconds, and analytics that were previously impossible are returned in minutes. 1010data's rich function library enables you to easily construct and execute any type of analysis:

- ◆ Time series analysis
- ◆ Time shifting
- ◆ Linear regression
- ◆ Principal component analysis
- ◆ Stratification
- ◆ Machine learning
- ◆ Linear recursion
- ◆ Logistic regression
- ◆ Statistical modeling

Analysis: Number of Listings and Average Price by Property Type

LEVERAGE INTERFACES TAILORED TO EVERY ROLE

1010data enables analytics for every role within your organization - including risk managers, analysts, quants, and developers - through the interface that best suits each user type. 1010data interfaces include:

- ◆ **Dashboards and reports** for users who need to manage overall performance and make strategic decisions

- ◆ An **Excel add-in** for conducting powerful analytics in a familiar environment
- ◆ 1010data's **Trillion Row Spreadsheet™** for the ultimate visual interface with flexibility, analytical power, data access, and data discovery capability
- ◆ **XML Query Language and SDK** for programmatically interfacing with 1010data, developing new applications, and enterprise integration
- ◆ **R1010** for use with your existing R-language models and data-frames

You can also conduct ad-hoc analysis using any of the variables provided in CoreLogic MLS including property type, square footage, # of bedrooms, # of bathrooms, year built, and more.

ACCESS THE CORELOGIC MLS DATABASE, INCLUDING APPROXIMATELY 60% OF REALTORS/AGENTS IN THE MARKET

Key benefits include:

- ◆ Data sourced directly from the MLS and updated daily, ensuring the most accurate listing information
- ◆ Standardized data formats for easy searching across land use, property type, listing status, days on market and more
- ◆ Property profiles based upon the best quality tax roll data and MLS data sources

GET STARTED EASILY

Since there's no software, hardware or infrastructure to install, you can begin accessing the CoreLogic MLS dataset in just a few easy steps.
